## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

## INTRODUCTION

The Internal Revenue Service 1997 Public Use Tax File, which contains 111,065 records, was selected as part of the Statistics of Income program that was designed to tabulate and present statistical information for the 122.4 million Form 1040, Form 1040A, and Form 1040EZ Federal Individual Income Tax Returns filed for Tax Year 1997. The Individual Tax File is designed for making national level estimates.

The Tax Files which have been produced since 1960, consist of detailed information taken from SOI sample records. The public use versions of these sample files are sold in an unidentifiable form, with names, Social Security Numbers (SSN), and other similar information omitted. The primary uses made of these files have been to simulate the administrative and revenue impact of tax law changes, as well as to provide general statistical tabulations relating to sources of income and taxes paid by individuals.

The 1997 Tax File can be purchased through the Internal Revenue Service, Statistics of Income Division. Any questions concerning the cost and acquisition of the current Individual Tax File should be directed to:

Individual Public Use Tax Files for each of the Tax Years 1960, 1962, and 1966 through 1991 are available through the National Archives and Records Service. Questions concerning cost, acquisition, and delivery of these historical tax model files, should be addressed to:

The Archives order number for any of the above -mentioned historical Public Use Tax Model Files is 374-109-(A). In addition to the order number, the requester should also specify the tax year and version (Individual or State) of the file under consideration.

Please refer to the sections of this booklet titled "Individual Tax File Sample Description" for a more detailed discussion of the Tax File.

## DISCLOSURE AVOIDANCE PROCEDURES

To preserve the character of the microdata file while also protecting the identity of individuals, we have made the following changes to the Individual Tax File.

First, to make sure that it will be impossible to know whether a given taxpayer is represented in the sample, we have subsampled our 100 percent sample ${ }^{1}$ at a 33 percent rate. In addition, certain records (83) with extreme values were exempt from inclusion in the public-use file. Each of these records would have had a 33 percent chance of selection for the file. Therefore, the actual subsampling rate is slightly less than one third..

Second, those records that remain in our file from the 100 percent sample have been combined with other high income returns (defined as returns with $\$ 200,000$ or more of AGI) for the following processing changes:

- The State codes and all other geographic indicators have been removed for all high income records.
- Other codes and fields removed for these returns include: alimony paid, alimony received, and

[^0]
## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

blindness indicator.

- Also, certain codes (marital status, and exemptions for children living at home) have been modified (see section on Code Definitions for specific changes).
- Then, all of the high income returns have been sorted from largest to smallest for the field "State and local income taxes deductions". In this field, for every three records, in descending order, the average State and local income taxes deduction has been determined and that value has been placed in the State and local income taxes deduction field for each of the three records. This has been done over that part of the sample containing non-zero values in these field s. If the last group of records contains fewer than three, these records have been combined with the group of three immediately before it. This method of disguising data is called "blurring".
- High income returns have then been separated into 25 different classes based on marital status, the number of children living at home, and the size of salaries and wages. Within each of these 25 classes, returns have been sorted on salaries and wages. This field has then been blurred over consecutive records as described above for State and local income tax deductions. However, records have only been averaged with other records in the same class. Therefore, records within one of the 25 classes have not been averaged with records in any of the other 24 classes. The file was then sorted on real estate tax deductions (again, within the 25 classes), and on Net Receipts, and the same blurring procedure was repeated on each field. ${ }^{2}$

Third, all lower income returns (records with an adjusted gross income of less than \$200,000 and not from our 100 percent sample) have been blurred, nationally, for alimony paid and alimony received. Then, all lower income returns were sorted by State. After this sort, the records were blurred for salaries and wages, real estate tax deductions, Net Receipts, and State and local income taxes deduction (State of Wisconsin, only, for this last item) in the same manner as described above. The only difference between the processing of these records and that of the high income returns is that the lower income returns have been sorted for the blurred field by individual state with no records from two different States being combined when averaging a field over a series of records.

Fourth, for all records on the file, all fields on the file have been rounded to the four most significant
${ }^{2}$ For greater details on this and other disclosure protection techniques used by the Statistics of Income Division, see: Strudler, Michael; Oh, H. Lock; and Scheuren, Fritz. digits (e.g., $\$ 14,371=\$ 14,370$ and $\$ 228,867=\$ 228,900$ ).

Fifth, after additional disclosure testing, an additional 18 records were removed from the sample and the file was re-weighted.

Since individual records in this file may or may not contain data from just one tax return--and never contain the full item content of any one tax return--we request that researchers make these facts clear in publishing their findings. In particular, they should refrain from using any language that would imply that they had access to individual taxpayers' records.

## EXPLANATION OF FIELDS NOT ABSTRACTED DIRECTLY FROM TAX FORMS

The following explanations define data fields contained in the 1997 Individual Tax File that have not been abstracted directly from a specific line on Forms 1040, 1040A, 1040EZ, or the accompanying schedules and forms. Field numbers not appearing in this section have been entered on the specific lines on the forms or schedules from which the data were abstracted. Refer to the "1997 Federal Tax Forms" section of this booklet for further information.

## DEDUCTIONS

This is either Total Standard Deduction or Total Itemized Deductions. Only one can appear on each return. (Note: If the taxpayer had no income, but still included the total itemized deductions for which he/she was eligible, this amount is shown in Field 34; else the standard deduction for which he/she was eligible is shown.)

TAX ON TAXABLE INCOME
This is the amount shown in Field 39 less special taxes from Form 4972 (Tax on Lump Sum Distributions).

COMPUTED INCOME TAX
This is the amount arrived at by applying the Tax Rate Schedules to Taxable Income, without regard to the type of computation used by the taxpayer.

INCOME SUBJECT TO TAX

## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

For taxpayers filing current year returns, "Income Subject to Tax" is identical to taxable income except for: those dependents paying "kiddie" tax from Form 8615 ; and those returns with long-term capital gains taxed at the 28 percent rate (TXST equals 6 or 7). For dependents filing Form 8615 (TXST $=4$ or 8 ), this is the income taxed at child's rate. For taxpayers with long-term capital gains, this is only the income taxed at the regular rates (not any capital gains that were taxed at the maximum capital gains rate of 28 percent). For prior year returns, "income subject to tax" is computed by using the Tax Year tax rate schedule to impute a hypothetical taxable income amount necessary to yield the given amount of tax reported.

TOTAL TAX LIABILITY (SOI)
Total tax liability (Form 1040, line 53, Form 1040A, line 28, Form 1040-EZ, line 10) minus Advance Earned Income Credit (line 51, Form 1040) payments minus EIC USED TO OFFSET INCOME TAX BEFORE CREDITS (F61) minus EIC USED TO OFFSET ALL OTHER TAXES (F62) (but never less than zero).

EARNED INCOME FOR EARNED INCOME CREDIT
The total of earned income (salaries and wages and earned business income) used in computing the earned income credit, as shown on line 6 of the EIC Worksheet (page 23 of the Instructions for Form 1040). Note that this field is computed by SOI. Taxpayers are not required to file this worksheet with their return.

## EARNED INCOME CREDIT USED TO OFFSET INCOME TAX BEFORE

 CREDITSThis amount is the lesser of: Total Earned Income Credit or Income Tax Before Credits (F39) minus all credits except the Earned Income Credit.

1. Total EIC minus Earned Income Credit used to offset Income Tax Before Credits (F61); or
2. The sum of all other taxes (fields 52 through 56), plus the following tax items which are not shown separately: Advance EIC and Household Employment Taxes

> 63- EARNED INCOME CREDIT, REFUNDABLE PORTION
> EIC minus F61 minus F62 (see above for definitions and conditions).

TOTAL TAX PAYMENTS
Total payments shown on the tax form, minus the total Earned Income Credit (Form 1040 line 60 minus line 56a). This is limited to zero if there is a refundable EIC.

ITEMIZED DEDUCTION LIMITATION

NET EARNINGS FROM SELF-EMPLOYMENT INCOME
The lesser of line 6 (net Schedule SE earnings) or 9 (maximum amount subject to Social Security tax) on the combined Schedule SE. For the short form, Schedule SE, this is line 4.

## NET EARNINGS FROM SELF-EMPLOYMENT INCOME, SECONDARY TAXPAYER

The lesser of line 6 (net Schedule SE earnings) or 9 (maximum amount subject to Social Security tax) on the secondary taxpayer's Schedule SE. For the short form, Schedule SE, this is line 4.

## EARNED INCOME LIMITATION

The smaller of line 4 or 5 (primary or secondary earned income), Form 2441 , limited to a maximum of $\$ 10,000$.

## COMBINED TAX PREFERENCES

Sum of the amounts on lines $3,4,7,8,9,10,11,12$ and 13, Form 6251. The amounts on lines 1, 2, 5 and 6 can be determined from items on Form 1040 or Schedule A.

RETURN ID
A unique number assigned for each sampled tax return during processing.
DECIMAL WEIGHT
This field was derived by dividing the computer population count of returns in a sample stratum by the number of sample returns for that stratum (carried to two decimal places). The decimal place is implied. Estimates derived from each return record must be multiplied by this decimal weight and divided by 100 .

SAMPLE COUNT
The number of sampled tax returns found in the given sample code.
POPULATION COUNT
The number of tax returns in the population for a given sample code.

## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

## TECHNICAL DESCRIPTION OF THE FILE

The Public Use file is available on CD-ROM in ASCII format. The record length is 2432 where the last byte is an end of record marker.

All codes are unsigned. The data fields are signed positive or negative, whichever is appropriate, in the first character position of the field.

Codes are 2 characters in length with leading zeros. The largest value is 99 . The fields in the file are 12 characters in length with leading zeros and with " + " or "-" leading signs.

## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

## SAMPLE DESCRIPTION

This section describes the sample design and selection, the method of estimation, the sampling variability of the estimates, and the methodology of computing confidence intervals.

## Domain of Study

The data in this file are estimates from a probability sample of unaudited Individual Income Tax Returns, Forms 1040, 1040A, 1040EZ, 1040PC, 1040T and 1040TEL (including electronic returns) filed by U.S. citizens and residents during Calendar Year 1998.

All returns processed during 1998 were subjected to sampling except tentative and amended returns. Tentative returns were not subjected to sampling because the revised returns may have been sampled later, while amended returns were excluded because the original returns had already been subjected to sampling. A small percentage of returns were not identified as tentative or amended until after sampling. These returns, along with those that contained no income information, were excluded in calculating estimates. This resulted in a small difference between the population total ( $123,045,360$ returns) reported in Table A and the estimated total of all returns (122,422,010 returns) generated using the Public Use Tax File. In addition, the perfection of money amounts during Statistics of Income processing, as well as the blurring techniques used in creation of the Public Use File, may have shifted some returns from one income class to another, making it impossible to replicate Table A exactly from the Public Use sample.

The records found in this file are intended to represent all returns filed for Tax Year 1997. While about 98 percent of the returns processed during Calendar Year 1998 were for Tax Year 1997, a few were for noncalendar years ending during 1997 and 1998, and some were returns for prior years. Returns for prior years were used in place of 1997 returns received and processed after December 31, 1998. This was done in the belief that the characteristics of returns due, but not yet processed, could best be represented by the returns for previous income years that were processed in 1998.

## Sample Design and Selection

The sample design is a stratified probability sample, in which the population of tax returns is classified into subpopulations, called strata, and a sample is selected independently from each stratum. Strata are defined by:

1. Nontaxable with adjusted gross income or expanded income of $\$ 200,000$ or over and no alternative minimum tax.

## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

2. 
3. Presence or absence of special Forms or Schedules (Form 2555, Form 1116, Form 1040 Schedule C, and Form 1040 Schedule F).
4. Total gross positive or negative income. Sixty variables are used to derive positive and negative incomes. These positive and negative classes are deflated using the Gross Domestic Product Implicit Price Deflator to represent a base year of 1991.
5. Potential usefulness of the return for tax policy modeling. Thirty-two variables are used to determine how useful the return is for tax modeling purposes.

Table A shows the population and sample count for each stratum after collapsing some strata with the same sampling rates. The sampling rates range from 0.022 percent to 100 percent.

Tax data processed to the IRS Individual Master File at the Martinsburg Computing Center during Calendar Year 1998 were used to assign each taxpayer's record to the appropriate stratum and to determine whether or not the record should be included in the sample. Records are selected for the sample either if they possess certain combinations of the four ending digits of the social security number, or if their ending five digits of an eleven-digit number generated by a mathematical transformation of the SSN is less than or equal to the stratum sampling rate times 100,000 .

## Data Capture and Cleaning

Data capture for the SOI sample begins with the designation of a sample of administrative records. While the sample was being selected, the process was continually monitored for sample selection and data collection errors. In addition, a small subsample of returns was selected and independently reviewed, analyzed, and processed for a quality evaluation.

The administrative data and controlling information for each record designated for this sample was loaded onto an online database at the Cincinnati Service Center. Computer data for the selected administrative records were then used to identify inconsistencies, questionable values, and missing values as well as any additional variables that an editor needed to extract for each record. The editors use a hardcopy of the taxpayer's return to enter the required information onto the online system. Data are also adjusted during editing in an attempt to achieve consistent statistical definitions. For example, a taxpayer may report director's fees on the other income line of the Form 1040 return. If this situation was detected during editing, the amount of director's fees were added to the salaries and wages field.

After the completion of service center review, data were further validated, tested, and balanced at

## 1997 STATISTICS OF INCOME PUBLIC USE TAX FILE

the Detroit Computing Center. Adjustments and imputations for selected fields were used to make each record internally consistent.

Some returns designated for the sample were not available for SOI processing because other areas of IRS needed the return at the same time. For Tax Year 1997, 0.25 percent of the sample returns were unavailable.

## Method of Estimation

Weights were obtained by dividing the population count of returns in a stratum by the number of sample returns for that stratum. The weights were adjusted to correct for misclassified returns.

'This population includes an estimated 483,623 returns that were excluded from other tables in this report because they contained no income information or represented amended or tentative returns identified after sampling.
${ }^{2}$ This population includes 111 Form 1040 returns that were misclassified because of bad data collected during revenue processing
${ }^{3}$ Each population member is assigned a degree of interest based on how useful it is for tax modeling purposes. Degree of interest ranges from one (1) to four (4), with a one being assigned to returns that are the least
interesting, and a four being assigned to those that are the most interesting. 'All' refers to income classes for which returns with all four degrees of interest are assigned.
${ }^{4}$ Positive and Negative Income classes are divided by a Gross Domestic Product Deflator of 1.1403 to represent a base year of 1991

This population includes an estimated 483,623 returns that were excluded from other tables in this report because they contained no income information or represented amended or tentative returns identified after sampling.
This population includes 111 form 1040 returns that were misclassified because of bad data collected during revenue processing.
${ }^{\circ}$ Each population member is assigned a degree of interest based on how useful it is for tax modeling purposes. Degree of interest ranges from one (1) to four (4), with a one being assigned to returns that are the least
interesting, and a four being assigned to those that are the most interesting. 'All' refers to income classes for which returns with all four degrees of interest are assigned.
${ }^{4}$ Positive and Negative Income classes are divided by a Gross Domestic Product Deflator of 1.1403 to represent a base year of 1991 .

1997 FEDERAL TAX FORMS (with element numbers referenced)

## 1997 STATE NON-PUBLIC USE TAX FILE

## FIELD NUMBERS

Field Numbers presented on the tax forms and schedules lines can be used to cross reference to the Core Record Layout. An example of this is line 7 on the Form 1040 which has a field number of 1 .

```
7 Wages, salaries, tips, etc.--------------------------- 1
```

On the Core Record Layout it would appear as "1" to the left of the Salaries and Wages line. See example below.

> -- Record Layout --

1. SALARIES AND WAGES
2. TAXABLE INTEREST INCOME
3. TAX-EXEMPT INTEREST INCOME

Another example, Line 8a, Taxable Interest Income, on the Form 1040 (see below) has a field number of 2. This field number is cross referenced to the Taxable Interest Income line on the 1997 Core Record Layout, which contains the number 2 to the left of the line (see above).

8a Taxable Interest Income 2

## Nontaxable Earned Income

Certain earned income is not taxable, but it must be included to see if you can take the earned income credit. It is also used to figure the credit. It includes anything of value (money, goods, or services) that is not taxable that you received from your employer for your work. Some examples are listed below.

- Basic quarters and subsistence allowances, the value of in-kind quarters and subsistence, and combat zone excluded pay received from the U.S. military. These amounts should be shown in box 13 of your 1997 W-2 form with code $\mathbf{Q}$.
- Housing allowances or rental value of a parsonage for clergy members. But if you are filing Schedule SE, see Clergy below.
- Meals and lodging provided for the convenience of your employer.
- Voluntary salary deferrals. If you chose to have your employer contribute part of your pay to certain retirement plans (such as a 401(k) plan or the Federal Thrift Savings Plan) instead of having it paid to you, the "Deferred compensation" box in box 15 of your W-2 form should be checked. The amount deferred should be shown in box 13 of your W-2 form.
- Excludable dependent care benefits from Form 2441, line 18.
- Excludable employer-provided adoption benefits from Form 8839, line 22.
- Voluntary salary reductions, such as under a cafeteria plan, unless they are included in box 1 of your W-2 form(s). For details, see Pub. 596.

(1)Nontaxable earned income does not include welfare benefits, such as those listed on this page.

## Modified AGI (Adjusted Gross Income)

Modified AGI is the amount on Form 1040, line 32 , increased by the amount of (1) any loss claimed on Form 1040, line 13, and (2) one-half of any losses on Form 1040, lines 12 and 18. But see Pub. 596 to figure your modified AGI if you are filing Schedule E or you are claiming a loss from the rental of personal property not used in a trade or business.

## Effect on Certain Welfare Benefits

Any refund you receive as a result of claiming the EIC will not be used to determine if you are eligible for the following programs, or how much you can receive from them.

- Temporary Assistance for Needy Families (formerly Aid to Families With Dependent Children (AFDC)).
- Medicaid and supplemental security income (SSI).
- Food stamps and low-income housing.

If filing a joint return and your spouse was also self-employed or reported income and expenses on Schedule C or C-EZ as a statutory employee, combine your spouse's amounts with yours to figure the amounts to enter below.

1. If you are filing Schedule SE:
a. Enter the amount from Schedule $S E$, Section A, line 3, or Section B, line 3, whichever applies
$1 a$.
b. Enter the amount, if any, from Schedule SE, Section B, line 4b

e. Subtract line 1d from line 1c
2. If you are NOT required to file Schedule SE (for example, because your net earnings from self-employment were less than $\$ 400$ ), complete lines $2 a$ through $2 c$. But do not include on these lines any statutory employee income or any amount exempt from self-employment tax as the result of the filing and approval of Form 4029 or Form 4361.
a. Enter any net farm profit or (loss) from Schedule $F$, line 36, and farm partnerships, Schedule K-1 (Form 1065), line 15a

2a.
b. Enter any net profit or (loss) from Schedule C, line 31 , Schedule C-EZ, line 3 , and Schedule K-1 (Form 1065), line 15a (other than farming).

2b. $\qquad$
c. Add lines $2 a$ and $2 b$. Enter the total even if a loss

2c.
3. If you are filing Schedule C or C-EZ as a statutory employee, enter the amount from line 1 of that Schedule $C$ or $C-E Z$.
3. $\qquad$
4. Add lines $1 e, 2 c$, and 3 . Enter the total here and on line 5 of the worksheet on page 23 even if a loss. If the reswtiblass, OF
enter it in parentheses and read the Caution below . . . 4.
Caution: If line 5 of the Earned Income Credit Worksheet is a loss, subtract it from the total of lines 3 and 4 of that worksheet and enter the result on line 6 of that worksheet. If the result is zero or less, you cannot take the earned income credit.

## Special Rules

## Members of the Military

If you were on extended active duty outside the United States, your home is considered to be in the United States during that duty period. See Pub. 596 for the definition of extended active duty.

## Clergy

If you are filing Schedule SE and the amount on line 2 of that schedule includes an amount that was also reported on Form 1040, line 7, follow these special rules. First, write "Clergy" directly to the right of line 56a. If you received a housing allowance or were provided housing, do not include the allowance or rental value of the parsonage as nontaxable earned income on line 4 of the worksheet on page 23 (or on line 56b of Form 1040) if it is required to be included on Schedule SE, line 2.
Then, if you are figuring the earned income credit yourself, determine how much of the income reported on Form 1040, line 7, was also reported on Schedule SE, line 2. Next, subtract that income from the amount on Form 1040, line 7. Then, enter only the result on line 1 of the worksheet on page 23. Last, be sure to complete the worksheet on this page.

## Household Employees

If you were a household employee who did not receive a W-2 form because your employer paid you less than $\$ 1,000$ in 1997, be sure to include the amount you were paid on Form 1040, line 7. Enter "HSH" and the amount not reported on a W-2 form on the dotted line next to line 7.

## Inmates

Amounts paid to inmates in penal institutions for their work are not earned income for purposes of the EIC. If the total on Form 1040, line 7, includes such income, subtract that income from the amount on line 7. Enter the result on line 1 of the worksheet on page 23. Also, enter "PRI" and the amount subtracted on the dotted line next to line 7 .

## Who Must File Schedule SE

You must file Schedule SE if:

- You had net earnings from self-employment from other than church employee income (line 4 of Short Schedule SE or line 4c of Long Schedule SE) of $\$ 400$ or more, OR
- You had church employee income of $\$ 108.28$ or more. Income from services you performed as a minister or a member of a religious order is not church employee income. See page SE-1.
Note: Even if you had a loss or a small amount of income from self-employment, it may be to your benefit to file Schedule SE and use either "optional method" in Part II of Long Schedule SE. See page SE-3.
Exception. If your only self-employment income was from earnings as a minister, member of a religious order, or Christian Science practitioner and you filed Form 4361 and received IRS approval not to be taxed on those earnings, do not file Schedule SE. Instead, write "Exempt-Form 4361" on Form 1040, line 47.

## May I Use Short Schedule SE or MUST I Use Long Schedule SE?

## Section A-Short Schedule SE. Caution: Read above to see if you can use Short Schedule SE.

1 Net farm profit or (loss) from Schedule F, line 36, and farm partnerships, Schedule K-1 (Form 1065), line 15a

2 Net profit or (loss) from Schedule C, line 31; Schedule C-EZ, line 3; and Schedule K-1 (Form 1065), line 15a (other than farming). Ministers and members of religious orders, see page SE-1 for amounts to report on this line. See page SE-2 for other income to report.

3 Combine lines 1 and 2
4 Net earnings from self-employment. Multiply line 3 by $92.35 \%$ (.9235). If less than $\$ 400$, do not file this schedule; you do not owe self-employment tax
5 Self-employment tax. If the amount on line 4 is:

- $\$ 65,400$ or less, multiply line 4 by $15.3 \%$ (.153). Enter the result here and on Form 1040, line 47.
- More than $\$ 65,400$, multiply line 4 by $2.9 \%$ (.029). Then, add $\$ 8,109.60$ to the result. Enter the total here and on Form 1040, line 47.

6 Deduction for one-half of self-employment tax. Multiply line 5 by 50\% (.5). Enter the result here and on Form 1040, line 26

## General Instructions

## Purpose of Form

Interest expense paid by an individual, estate, or trust on a loan allocable to property held for investment may not be fully deductible in the current year. Use Form 4952 to figure the amount of investment interest expense deductible for the current year and the amount, if any, to carry forward to future years.

For more details, see Pub. 550, Investment Income and Expenses.

## Who Must File

If you are an individual, estate, or a trust, and you claim a deduction for investment interest expense, you must complete and attach Form 4952 to your tax return, unless all the following apply.

- Your only investment income was from interest or dividends.
- You have no other deductible expenses connected with the production of interest or dividends.
- Your investment interest expense is not more than your investment income.
- You have no disallowed investment interest expense from 1996.

## Allocation of Interest Expense Under Temporary Regulations Section 1.163-8T

If you paid or accrued interest on a loan and used the loan proceeds for more than one purpose, you may have to allocate the interest. This is necessary because different rules apply to investment interest, personal interest, trade or business interest, home mortgage interest, and passive activity interest. See Pub. 535, Business Expenses.

## Specific Instructions

## Part I-Total Investment Interest Expense

## Line 1

Enter the investment interest paid or accrued during the tax year, regardless of when you incurred the indebtedness. Investment interest is interest paid or accrued on a loan (or part of a loan) that is allocable to property held for investment (as defined later).

Include investment interest expense reported to you on Schedule K-1 from a
partnership or an S corporation. Include amortization of bond premium on taxable bonds purchased after October 22, 1986, but before J anuary 1,1988 , unless you elected to offset amortizable bond premium against the interest payments on the bond. A taxable bond is a bond on which the interest is includible in gross income.

Investment interest expense does not include the following:

- Home mortgage interest.
- Interest expense that is properly allocable to a passive activity. Generally, a passive activity is any business activity in which you do not materially participate and any rental activity. See the separate instructions for Form 8582, Passive Activity Loss Limitations, for more details.
- Any interest expense that is capitalized, such as construction interest subject to section 263A.
- Interest expense related to tax-exempt interest income under section 265.
- Interest expense, disallowed under section 264, on indebtedness with respect to life insurance, endowment, or annuity contracts issued after J une 8, 1997, even if the proceeds were used to purchase any property held for investment.
- Attach to Form 1040 or Form 1040NR.

## General Instructions

Section references are to the Internal Revenue Code.

## Purpose of Form

Form 8801 is used by individuals, estates, and trusts to figure the minimum tax credit, if any, for alternative minimum tax (AMT) incurred in prior tax years after 1986. The form is also used to figure any minimum tax credit carryforward.

## Who Should File

Form 8801 should be completed by individuals, estates, and trusts that had:

- An AMT liability in 1996 and adjustments or preferences (other than exclusion items) in 1996,
- A minimum tax credit carryforward from 1996 to 1997, or
- A nonconventional source fuel credit or a qualified electric vehicle credit not allowed for 1996 (see the instructions for line 20).
File Form 8801 only if line 21 is more than zero.

## Specific Instructions

The AMT is attributable to two types of adjustments and preferences-deferral items and exclusion items. Deferral items generally do not cause a permanent
difference in taxable income over time (e.g., depreciation). Exclusion items, on the other hand, do cause a permanent difference (e.g., the standard deduction). The minimum tax credit is allowed only on the AMT attributable to deferral items.
Line 1. Estates and trusts. Skip lines 1 through 3 of Form 8801. Complete Parts I and II of another 1996 Form 1041, Schedule I. For Part I of Schedule I, take into account only exclusion items (the amounts included on lines 4a through 4d, $4 p$, and $4 q$ of Schedule I) and any other adjustments related to exclusion items included on line $4 u$ of Schedule I. On line 7 of Schedule I, use the minimum tax credit net operating loss deduction (MTCNOLD).
